PROJECTS

OKPizza • *(React, Rails, JavaScript, Flux)* Live • Github
Single-page React-on-Rails clone of OKCupid
- Filters questions via custom Rails association for user, to reduce retrieving unnecessary SQL data
- Syncs across all components with Flux unidirectional data flow, so user does not have outdated data showing

PuzzleAppCademy • *(JavaScript, HTML5 Canvas, KineticJS)* Live • Github
Time-based, orb matching puzzle game built on Canvas with KineticJS
- Ensures proper orb matches with a recursive algorithm, boosting performance and preventing false matches
- Utilizes KineticJS for game piece rendering and movement, allowing for better UX

HacktiveWreckerd • *(Ruby, SQL)* Github
Lightweight custom ORM built for Rails
- Creates associations to join different tables together, simplifying SQL database queries

SKILLS

Python • Ruby • Ruby on Rails • JavaScript • React • Flux • SQL • Git • HTML5 • CSS

WORK EXPERIENCE

ERP Maestro • **New York, NY** • *Dev Support Intern* • *4/2016 - 6/2016*
- Worked closely with developers to build and scale up SAP product for clients
- Compiled blog posts and dealt with computer setup and parts replacement, reducing developer downtime

Levinson Skin Care • **Granada Hills, CA** • *Office Manager* • *10/2012 - 12/2015*
- Managed business and administrative aspects of the company

Avalon English School • **Gumi, South Korea** • *Teaching Faculty* • *10/2011 - 10/2012*
- Managed multiple classrooms of 50+ students, developing methods to teach difficult concepts

EDUCATION

App Academy NYC • *6/2016 - 9/2016*
- Full stack web development course with a < 3% acceptance rate
- Created JavaScript practice assessment with Jasmine specs used with the official curriculum

California State University, Northridge • *9/2006 - 5/2010* • *Digital Animation*
- Designed models in Maya for usage in 3D animation

RELATED HOBBIES

- Designed custom maps for a popular Steam game that hit the top 12 Top Rated All Time
- Planned, created, designed, and debugged games from horror RPG's to story based mysteries
- Modified Atom CoffeeScript packages to have more robust, visually and auditorily appealing features

LANGUAGES

- Intermediate-Advanced Korean
